

NBB75DFIB-P

Isolated BNC chassis connector, feedthrough in black D-shape housing, protruding version (makes locking and unlocking of conventional BNC cable connectors easy)

Neutrik's BNC chassis connectors offer a true 75 Ω design for serial and digital (HD) signals. The machined brass connector body provides an extremely rugged and non-abrasive connection over long term use in a D-shape housing (audio industry standard).

Features & Benefits

- Gold plated cage type center contact
- True 75 Ω design meets the stringent HD requirements
- Isolated panel mount (solves potential grounding problems and prevents common-mode influence with other connections conducted over the same panel ground potential)
- Standard D-shape housing
- Protruding bulkhead jack (makes locking and unlocking of conventional BNC cable connectors easy)
- Color coding possible

New cage type contact

- Closed contact design - extremely robust
- Gold plated cage type clip - best possible shielding and lowest contact resistance
