

## NA2-IO-DPRO

**\*DISCONTINUED\***

The NA2-IO-DPRO is a 2IN, 2OUT breakout box designed to connect legacy audio equipment with the Dante<sup>®</sup> network. It features high-quality microphone preamps and 2 Dante<sup>®</sup> ports for either redundant setup or daisy chaining. Audio parameters are adjusted either by Neutrik's DPRO controller or a number of common control software.

All connectors are lockable and, together with the removable rubber protection, offer a reliable solution for tough stage conditions. With optional mounting brackets or a rack panel, the box can be mounted below tables, in floor boxes, racks or on a truss.

## Features & Benefits

- ✓ Lockable audio and network connections
- ✓ Connect up to two analog line or mic signals to a Dante<sup>®</sup> network
- ✓ Connect AES/EBU signals to a Dante<sup>®</sup> network and provide an AES/EBU signal from the Dante<sup>®</sup> network
- ✓ Feed non Dante<sup>®</sup> ready amplifiers, speakers or mixing desks with signals from the Dante<sup>®</sup> network
- ✓ Primary and Secondary Dante<sup>®</sup> ports
- ✓ Setting of all audio parameters via the DPRO controller software. Yamaha CL/QL mixer, QSYS plug in and Crestron module
- ✓ Different mounting options (rack, truss, floorbox, table mounting)

- ✓ Requires a Power over Ethernet switch or a PoE injector (802.3 af/at/bt)
