

## Neutrik AG Quality Statement

Neutrik commits itself to innovative, high quality standard products, service excellence and environmental protection.

Our quality policy is to develop, produce and deliver on time, products and services that meet or exceed customer expectations. In order to do this, we have implemented a quality system and processes that are continually being improved to satisfy our customer needs.

Neutrik operates to a process-oriented quality management system (QMS) in conformance to the requirements of the internationally recognized ISO 9001 quality standard.

The key elements of this strategy are:

- SQS, IQNet, ISO 9001 certified
- AQL inspection system
- Multistage quality control system
- Strong management and employee commitment to quality
- Proper and continuously improved designs
- Well selected sub-suppliers
- Monitoring of our supply chain

Continuous improvement is a key issue at Neutrik. The QMS and quality policy are regularly reviewed under the guidance of the Chief Executive Officer. In our efforts to meet the standard requirements, regular internal and external (SQS, Swiss Association for Quality and Management Systems) audits ensure to achieve our demanding quality objectives.

Neutrik recognizes that the protection of the earth environment is one of the most important subjects of mankind and consider it important to contribute positively to the preservation of environmental resources. Our products are developed and manufactured in an environmentally acceptable manner. For us, environmental protection represents a long-term obligation to preserve resources for future generations. In this respect we agree with and fulfil international standards like RoHS, REACH etc. as well specific requirements of our customer base.
